

Patient Name	: Mr MR.DUMMY	Sample Collected	: Apr 26, 2024, 01:00 PM.
DOB/Age/Gender	: 23 Y/Male	Report Date	: May 07, 2024,04:03 PM.
Patient ID / UHID	: 8053279/RCL7248003	Barcode No	: MD072087
Referred By	: Dr. X	Report Status	: Final Report
Sample Type	: Whole blood EDTA		

Chikungunya DNA Detection By PCR

Test Name	Chikungunya RT PCR
Specimen	Blood
Results	
Chikungunya Virus RNA PCR	NOT DETECTED
Method	Real Time PCR

Method: Nested PCR

Interpretation:

1. Chikungunya virus (CHIKV) is a mosquito borne alpha virus, and infection with the virus causes Chikungunya fever, a debilitating, non-fatal viral illness.
2. This test is indicated in patients with high fever, petechial or maculopapular rash of the trunk (occasionally the limbs), and arthralgia or arthritis affecting multiple joints.
3. Presence of PCR inhibitors may interfere with amplification resulting in a false negative result. Presence of Chikungunya below the limit of detection of the assay will be undetected.

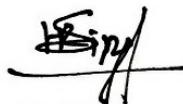

*** End Of Report ***

Disclaimer: Method given in report are only indicative and can be changed depending upon type of machine and kit available at time of testing.

Not all tests at all locations are under NABL scope. Availability of tests under NABL scope varies from lab to lab.

All Lab results are subject to clinical interpretation by qualified medical professional and this report is not subject to use for any medico-legal purpose.

Terms and Conditions of Reporting

1. The presented findings in the Reports are intended solely for informational and interpretational purposes by the referring physician or other qualified medical professionals possessing a comprehensive understanding of reporting units, reference ranges, and technological limitations. The laboratory shall not be held liable for any interpretation or misinterpretation of the results, nor for any consequential or incidental damages arising from such interpretation.
2. It is to be presumed that the tests performed pertain to the specimen/sample attributed to the Customer's name or identification. It is presumed that the verification particulars have been cleared out by the customer or his/her representation at the point of generation of said specimen / sample. It is hereby clarified that the reports furnished are restricted solely to the given specimen only.
3. It is to be noted that variations in results may occur between different laboratories and over time, even for the same parameter for the same Customer. The assays are performed and conducted in accordance with standard procedures, and the reported outcomes are contingent on the specific individual assay methods and equipment(s) used, as well as the quality of the received specimen.
4. This report shall not be deemed valid or admissible for any medico-legal purposes.
5. The Customers assume full responsibility for apprising the Company of any factors that may impact the test finding. These factors, among others, includes dietary intake, alcohol, or medication / drug(s) consumption, or fasting. This list of factors is only representative and not exhaustive.

DISCLAIMER

This is a sample report provided for demonstration purposes only and does not represent an actual patient report. Test results, reference ranges, methodologies, instrumentation, and report formats may vary depending on the laboratory performing the test. The format and representation shown are indicative of reports generated by the National Reference Laboratory of Redcliffe Labs, Noida. This sample report should not be used for medical interpretation, diagnosis, or treatment decisions.
