BIOCHEMISTRY REPORT

CA 15.3 (Breast Cancer Marker)

CA 15.3; BREAST CANCER MARKER, SERUM	36.8	U/mL	<31.3 U/mL
--------------------------------------	-------------	------	------------

Method : CMIA

Note:- Result rechecked. Please correlate clinically.

Interpretation:

Note :

1. This test is not recommended to screen Breast cancer in the general population.
2. False negative/positive results are observed in patients receiving mouse monoclonal antibodies for diagnosis or therapy.
3. Patients with confirmed Breast cancer may show normal pre-treatment CA 15.3 levels. Hence this assay, regardless of level, should not be interpreted as absolute evidence for the presence or absence of malignant disease. The assay value should be used in conjunction with findings from clinical evaluation and other diagnostic procedures.

Clinical Use :

1. An aid in the management of Breast cancer patients. It is useful in monitoring therapy and progression in Metastatic Breast cancer patients. A significant increase in levels must be at least 25% that correlates with disease progression in 90% of the patients. A decrease of at least 25% in levels correlates with regression of the disease in 78% of patients
2. Predict recurrence in patients with stage II / III Breast carcinoma

Booking Centre :- Jabalpur High Tech Path Lab, In Front Of Hardoul Mandir, Shahinaka Garha, Jabalpur, Madhya Pradesh- 482003
Processing Lab :- Redcliffe Lifetech Pvt. Ltd., H-55, Sector-63, Noida, Uttar Pradesh - 201301

Terms and Conditions of Reporting

1. The presented findings in the Reports are intended solely for informational and interpretational purposes by the referring physician or other qualified medical professionals possessing a comprehensive understanding of reporting units, reference ranges, and technological limitations. The laboratory shall not be held liable for any interpretation or misinterpretation of the results, nor for any consequential or incidental damages arising from such interpretation.
2. It is to be presumed that the tests performed pertain to the specimen/sample attributed to the Customer's name or identification. It is presumed that the verification particulars have been cleared out by the customer or his/her representation at the point of generation of said specimen / sample. It is hereby clarified that the reports furnished are restricted solely to the given specimen only.
3. It is to be noted that variations in results may occur between different laboratories and over time, even for the same parameter for the same Customer. The assays are performed and conducted in accordance with standard procedures, and the reported outcomes are contingent on the specific individual assay methods and equipment(s) used, as well as the quality of the received specimen.
4. This report shall not be deemed valid or admissible for any medico-legal purposes.
5. The Customers assume full responsibility for apprising the Company of any factors that may impact the test finding. These factors, among others, includes dietary intake, alcohol, or medication / drug(s) consumption, or fasting. This list of factors is only representative and not exhaustive.

DISCLAIMER

This is a sample report provided for demonstration purposes only and does not represent an actual patient report. Test results, reference ranges, methodologies, instrumentation, and report formats may vary depending on the laboratory performing the test. The format and representation shown are indicative of reports generated by the National Reference Laboratory of Redcliffe Labs, Noida. This sample report should not be used for medical interpretation, diagnosis, or treatment decisions.
