CLINICAL PATHOLOGY REPORT

Drugs Of Abuse Urine: Cannabinoids / Marijuana

MARIJUANA SCREEN, URINE	Negative	Negative
Method : (Lateral Flow Immunoassay)		

Interpretation:

Note :

1. A single urine test cannot differentiate casual use from chronic drug abuse.
2. Urine drug testing cannot predict extent of impairment, drug dose or exact time of use.
3. This is a screening test. All positive results must be confirmed by Gas chromatography /Mass Spectrometry (GC/MS).
4. Negative results indicate absence of drug in urine or concentrations below the assay cutoff.

Intended use :

1. Drug abuse treatment programs
2. Pain management clinics
3. Organ transplantation programs
4. Psychiatric programs.

Comments :

The principal psychoactive cannabinoid is delta - 9 - tetrahydrocannabinol (THC) which is released slowly from tissue storage sites. Infrequent smokers may test positive for 2 to 5 days after last Marijuana/Hashish use; chronic smokers may test positive even 3 to 4 weeks after abstinence. False positive result may be seen with Ketoconazole.

Dr. Priti Sonkar
MD Pathologist

Booking Centre :- SHREE RUDRA- DEV PATHLAB, Moradabad
Processing Lab :- Redcliffe Lifetech Pvt. Ltd., H-55, Sector-63, Noida, Uttar Pradesh - 201301

Terms and Conditions of Reporting

1. The presented findings in the Reports are intended solely for informational and interpretational purposes by the referring physician or other qualified medical professionals possessing a comprehensive understanding of reporting units, reference ranges, and technological limitations. The laboratory shall not be held liable for any interpretation or misinterpretation of the results, nor for any consequential or incidental damages arising from such interpretation.
2. It is to be presumed that the tests performed pertain to the specimen/sample attributed to the Customer's name or identification. It is presumed that the verification particulars have been cleared out by the customer or his/her representation at the point of generation of said specimen / sample. It is hereby clarified that the reports furnished are restricted solely to the given specimen only.
3. It is to be noted that variations in results may occur between different laboratories and over time, even for the same parameter for the same Customer. The assays are performed and conducted in accordance with standard procedures, and the reported outcomes are contingent on the specific individual assay methods and equipment(s) used, as well as the quality of the received specimen.
4. This report shall not be deemed valid or admissible for any medico-legal purposes.
5. The Customers assume full responsibility for apprising the Company of any factors that may impact the test finding. These factors, among others, includes dietary intake, alcohol, or medication / drug(s) consumption, or fasting. This list of factors is only representative and not exhaustive.

DISCLAIMER

This is a sample report provided for demonstration purposes only and does not represent an actual patient report. Test results, reference ranges, methodologies, instrumentation, and report formats may vary depending on the laboratory performing the test. The format and representation shown are indicative of reports generated by the National Reference Laboratory of Redcliffe Labs, Noida. This sample report should not be used for medical interpretation, diagnosis, or treatment decisions.
