

Patient Name : Mr MR.DUMMY	Sample Collected : Apr 26, 2024, 01:00 PM
DOB/Age/Gender : 23 Y/Male	Report Date : May 24, 2024, 06:02 PM.
Patient ID / UHID : 8052303/RCL7248779	Barcode No : SI484294
Referred By : Dr. X	Report Status : Final Report
Sample Type : Serum	

Test Description	Value(s)	Unit(s)	Reference Range
------------------	----------	---------	-----------------

Endomysial Antibody IgA With Titre By IFA

Endomysial Antibody IgA With Titre By IFA (Immunofluorescent Assay)	Negative		Negative Sample screening dilution is 1:10
--	----------	--	--

Interpretation:
Note:
 Sample screening dilution 1:10

Note:
 1. Autoimmune reactivities are not by themselves diagnostic, but must be correlated with other laboratory & clinical findings.
 2. A useful test for exclusion is HLA - DNA testing for the presence DQ 2 (DQB1*02, DQA1*05) and DQ8 (DQB1*03, DQA1*03). Celiac disease can be excluded in 90% cases if all these alleles are negative.
 3. Test conducted on Serum

Comments:
 IgA class of Endomysia antibodies are present in nearly 100% patients of celiac disease. Thus their identification is considered diagnostically sensitive and specific for Gluten sensitive enteropathies. Postivity is also seen in some cases of dermatitis herpetiformis.

DISEASE	PERCENT POSITIVITY
Confirmed Celiac disease	
On Gluten	100
On Gluten free diet	46
Suspected Celiac disease	
On Gluten	90
On Gluten free diet	17
Dermatitis herpetiformis	80

Terms and Conditions of Reporting

1. The presented findings in the Reports are intended solely for informational and interpretational purposes by the referring physician or other qualified medical professionals possessing a comprehensive understanding of reporting units, reference ranges, and technological limitations. The laboratory shall not be held liable for any interpretation or misinterpretation of the results, nor for any consequential or incidental damages arising from such interpretation.
2. It is to be presumed that the tests performed pertain to the specimen/sample attributed to the Customer's name or identification. It is presumed that the verification particulars have been cleared out by the customer or his/her representation at the point of generation of said specimen / sample. It is hereby clarified that the reports furnished are restricted solely to the given specimen only.
3. It is to be noted that variations in results may occur between different laboratories and over time, even for the same parameter for the same Customer. The assays are performed and conducted in accordance with standard procedures, and the reported outcomes are contingent on the specific individual assay methods and equipment(s) used, as well as the quality of the received specimen.
4. This report shall not be deemed valid or admissible for any medico-legal purposes.
5. The Customers assume full responsibility for apprising the Company of any factors that may impact the test finding. These factors, among others, includes dietary intake, alcohol, or medication / drug(s) consumption, or fasting. This list of factors is only representative and not exhaustive.

DISCLAIMER

This is a sample report provided for demonstration purposes only and does not represent an actual patient report. Test results, reference ranges, methodologies, instrumentation, and report formats may vary depending on the laboratory performing the test. The format and representation shown are indicative of reports generated by the National Reference Laboratory of Redcliffe Labs, Noida. This sample report should not be used for medical interpretation, diagnosis, or treatment decisions.
