

Patient Name : Mr MR.DUMMY		Sample Collected : Apr 26, 2024, 01:00 PM	
DOB/Age/Gender : 23 Y/Male		Report Date : May 24, 2024, 06:38 PM.	
Patient ID / UHID : 8052364/RCL7248884		Barcode No : SI484377	
Referred By : Dr. X		Report Status : Final Report	
Sample Type : Serum			

Test Description	Value(s)	Unit(s)	Reference Range
------------------	----------	---------	-----------------

Herpes Simplex Virus (HSV) 1 + 2 IgM Antibody

Herpes simplex virus 1+2, IgM <i>EIA, SERUM</i>	0.23	Index	
--	------	-------	--

Interpretation:

RESULT IN INDEX	REMARKS
< 0.9	Negative
0.9 and 1.1	Equivocal
> 1.1	Positive

The Herpes simplex virus (HSV) is a member of the Herpesviridae family, of which two types are known: type 1 (HSV-1) and type 2 (HSV-2) which present slight antigenic differences. HSV-1 causes chiefly oral-facial lesions, while HSV-2 is mainly responsible for genital lesions, but this distinction is not binding, both types occasionally causing infection in either anatomical site. HSV may also cause a form of ocular cheraatitis, and lesions of the central nervous system.HSV can affect practically the whole population. The primary infection is often in a subclinical form and is rarely diagnosed. After a latency period of variable duration, reactivation may occur and viral replication may or may not give rise to clinical lesions. Infection contracted during birth is of particular interest, this being an important cause of morbidity and mortality. It is therefore important to determine the immunitary state of women during pregnancy in order to detect serum conversion. The assay of specific IgM is important for the diagnosis of neonatal infection and encephalitis caused by HSV. Moreover, the presence of specific IgM indicates viral activity in progress, although it is not possible to distinguish between primary infection and reactivation.

All Lab results are subject to clinical interpretation by qualified medical professional and this report is not subject to use for any medico-legal purpose.

Terms and Conditions of Reporting

1. The presented findings in the Reports are intended solely for informational and interpretational purposes by the referring physician or other qualified medical professionals possessing a comprehensive understanding of reporting units, reference ranges, and technological limitations. The laboratory shall not be held liable for any interpretation or misinterpretation of the results, nor for any consequential or incidental damages arising from such interpretation.
2. It is to be presumed that the tests performed pertain to the specimen/sample attributed to the Customer's name or identification. It is presumed that the verification particulars have been cleared out by the customer or his/her representation at the point of generation of said specimen / sample. It is hereby clarified that the reports furnished are restricted solely to the given specimen only.
3. It is to be noted that variations in results may occur between different laboratories and over time, even for the same parameter for the same Customer. The assays are performed and conducted in accordance with standard procedures, and the reported outcomes are contingent on the specific individual assay methods and equipment(s) used, as well as the quality of the received specimen.
4. This report shall not be deemed valid or admissible for any medico-legal purposes.
5. The Customers assume full responsibility for apprising the Company of any factors that may impact the test finding. These factors, among others, includes dietary intake, alcohol, or medication / drug(s) consumption, or fasting. This list of factors is only representative and not exhaustive.

DISCLAIMER

This is a sample report provided for demonstration purposes only and does not represent an actual patient report. Test results, reference ranges, methodologies, instrumentation, and report formats may vary depending on the laboratory performing the test. The format and representation shown are indicative of reports generated by the National Reference Laboratory of Redcliffe Labs, Noida. This sample report should not be used for medical interpretation, diagnosis, or treatment decisions.
