

Patient Name	: Mr MR.DUMMY		
DOB/Age/Gender	: 23 Y/Male	Sample Collected	: Apr 26, 2024, 01:00 PM
Patient ID / UHID	: 8052516/RCL7248600	Report Date	: May 25, 2024, 02:21 PM.
Referred By	: Dr. Dr. X	Barcode No	: SI485173
Sample Type	: Serum	Report Status	: Final Report
Test Description	Value(s)	Unit(s)	Reference Range

Neuronal (Paraneoplastic) Antibody Panel (6 Parameters)

Amphiphysin	Negative	-	Negative
CV2.1	Negative	-	Negative
PNMA2 (Ma2/Ta)	Negative	-	Negative
ANNA-1/Hu	Negative	-	Negative
ANNA-2/Ri	Negative	-	Negative
PCA-1/Yo	Negative	-	Negative

Interpretation: Note: 1. It is recommended to confirm all positive results by Indirect Immunofluorescence 2. Negative results do not exclude the possibility of Paraneoplastic syndromes.		
Comments Paraneoplastic autoimmune neurological disorders reflect a patient's humoral and cellular immune responses to cancer. Seropositive patients usually present with subacute neurological symptoms of Encephalopathy, Cerebellar ataxia, Radiculopathy, Myelopathy & Neuromuscular transmission disorders. This assay is recommended in patients with past or family history of cancer, smoking and environmental exposure to carcinogens.		
Antibodies	Neurological syndrome	Typically associated tumors
Anti-Hu (ANNA 1)	• Sensory neuropathy • Chronic gastrointestinal pseudoobstruction • Cerebellar degeneration • Limbic encephalitis	Small cell bronchial carcinoma
Anti-Yo (PCA1)	Cerebellar degeneration	Ovarian & Breast carcinoma
Anti-CV2	• Chorea • Sensory neuropathy • Chronic gastrointestinal pseudoobstruction • Cerebellar degeneration • Limbic encephalitis	Small cell bronchial carcinoma Thymoma
Anti-Ma2 (Ma/Ta)	• Limbic encephalitis • Brainstem encephalitis • Cerebellar degeneration	Seminoma, Lung carcinoma
Anti-Ri (ANNA2)	Brainstem encephalitis	Breast & Small cell bronchial carcinoma
Anti-amphiphysin	Stiff-person syndrome	Breast & Small cell bronchial carcinoma

Report Status : Final Report

Test Description	Value(s)	Unit(s)	Reference Range
Uses · Serological evaluation of patients who present with a subacute neurological disorder of undetermined etiology, especially those with known risk factors for cancer · Investigating neurological symptoms that appear in the course of, or after, cancer therapy, and are not explainable by metastasis · To detect Occult malignancy · Differentiating autoimmune neuropathies from neurotoxic effects of chemotherapy · Monitoring the immune response of seropositive patients in the course of cancer therapy · Detecting early evidence of cancer recurrence in previously seropositive patients

Terms and Conditions of Reporting

1. The presented findings in the Reports are intended solely for informational and interpretational purposes by the referring physician or other qualified medical professionals possessing a comprehensive understanding of reporting units, reference ranges, and technological limitations. The laboratory shall not be held liable for any interpretation or misinterpretation of the results, nor for any consequential or incidental damages arising from such interpretation.
2. It is to be presumed that the tests performed pertain to the specimen/sample attributed to the Customer's name or identification. It is presumed that the verification particulars have been cleared out by the customer or his/her representation at the point of generation of said specimen / sample. It is hereby clarified that the reports furnished are restricted solely to the given specimen only.
3. It is to be noted that variations in results may occur between different laboratories and over time, even for the same parameter for the same Customer. The assays are performed and conducted in accordance with standard procedures, and the reported outcomes are contingent on the specific individual assay methods and equipment(s) used, as well as the quality of the received specimen.
4. This report shall not be deemed valid or admissible for any medico-legal purposes.
5. The Customers assume full responsibility for apprising the Company of any factors that may impact the test finding. These factors, among others, includes dietary intake, alcohol, or medication / drug(s) consumption, or fasting. This list of factors is only representative and not exhaustive.

DISCLAIMER

This is a sample report provided for demonstration purposes only and does not represent an actual patient report. Test results, reference ranges, methodologies, instrumentation, and report formats may vary depending on the laboratory performing the test. The format and representation shown are indicative of reports generated by the National Reference Laboratory of Redcliffe Labs, Noida. This sample report should not be used for medical interpretation, diagnosis, or treatment decisions.
